

Rescue Stammgleis Bubikon – Wolfhausen

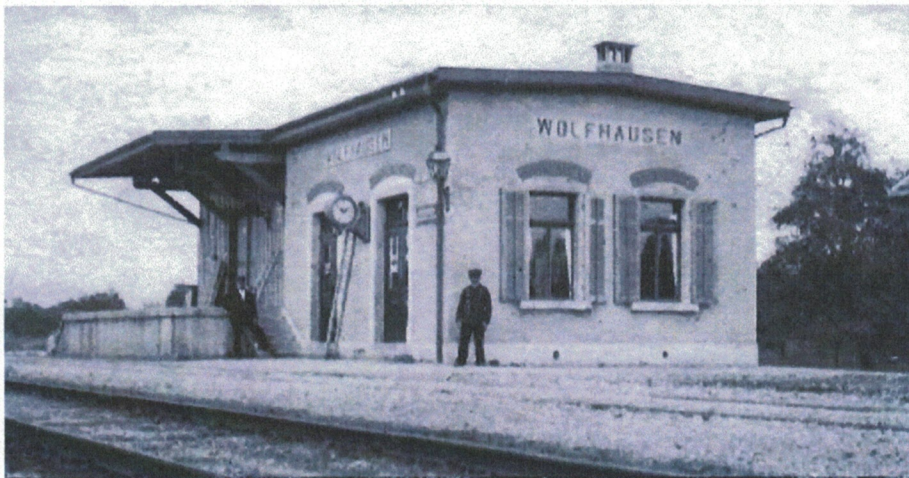

Re-entry in municipal plan

(Stammgleisinitiative)

The railway track from Ritterhaus Bubikon to the intersection with Oberwolfhauserstrasse in Wolfhausen is the last part of the former Stammgleis of the Uerikon-Bauma-Bahn (1901-1948), which together with the station building in Wolfhausen has remained intact as a whole.

This railway facility is an important, still intact witness of the industrial and railway culture in the municipality of Bubikon and should remain intact in its entirety.

If it is broken up by the sale of individual parts, this cultural heritage and a valuable railway transport infrastructure for future generations will be destroyed.

Stammgleis erhalten

Heimatverkauf stoppen
